META-TEMPLATES IN WEBSITE DEVELOPMENT AND METHODS THEREFOR

ABSTRACT

5   A computer-implemented method for creating a plurality of webpages, which includes providing a meta-template having therein at least one of a tag and a variable. There is included providing a user data model. There is further included expanding the meta-template against the first user data model using a template expander at build time, thereby obtaining a template. There is further
10   included expanding the template at run time against a data source, thereby obtaining codes implementing a webpage.
